## June Water News Keeping Our Community Flowing

### Hey Friends!

Summer is here, and with it comes sunny days, outdoor fun, and a few extra demands on our water supply. This month, we're sharing tips, facts, and events to help you stay hydrated, protect our water, and enjoy the season responsibly.

### Smart Summer Watering

Did you know watering your lawn early in the morning can save up to 25% more water than midday watering? Set sprinklers to run before 9 a.m. and check for leaks in hoses and irrigation systems. Your plants — and our shared water supply — will thank you!

### Stay Cool, Stay Hydrated

Hot weather means your body needs more water. Keep a reusable bottle handy and try adding fresh fruit or herbs for a refreshing twist. On National Hydration Day (June 23), challenge your family to drink only water for the day — your health will notice the difference.

### Protecting Our Rivers & Lakes

June is National Rivers Month! Everything that goes down our storm drains can end up in local waterways. Please avoid washing cars on driveways, dispose of chemicals properly, and join a community cleanup if you can. Together, we can keep our rivers clean and thriving.

### Quick Summer Plumbing Check

A dripping outdoor faucet can waste hundreds of gallons over the summer. Take a few minutes to inspect taps, hoses, and sprinkler heads. Small fixes now can prevent big water bills later.

JUNE

20

MON	TUE	WED	THU	FRI	SAT
1	2	3	4	5	6
8	9	10	11	12	13
15	16	17	18	19	20
22	23	24	25	26	27
29	30				

## Mark Your Calendar

- **June 5 - World Environment Day:**  
Share your favorite water-saving tip with friends.

- **June 23 - National Hydration Day:**  
Drink up and stay healthy!
